BEE VS FLY

The difference between a bee and a fly:

A bee has style and shine,
a fly is mostly grey.

A bee searches for flowers,
a fly just looks for shit.

A bee brings nectar to her community,
a fly just brings more flies onto the shit.

A bee honors her queen and the other bees,
a fly honors just shit and doesn't give a shit.

A bee feeds her community and lets it grow,
a fly just produces shit.

A bee can defend herself when threatened,
a fly just annoys.

A bee brings sense to the world,
a fly just dies after a while, senseless.

Conclusion:
just because you can fly like a bee, don't be just a fly.
Shine, and do something good in your life and in ours.

Bee yourself.
